

## **SCHEDULING**

- Integrating scheduling and control functions in computer integrated  
manufacturing using artificial intelligence  
Luis Carlos Rabelo and Sema Alptekin 101
- Smart shop floor scheduling using knowledge based simulation  
Tatchapol Poshyanonda, Cihan H. Dagli, Yildirim Omurtag and Vizes Nakornchai 107
- An interactive graphical aided scheduling system  
Ralph V. Rogers 113
- Robust planning and scheduling for automated batch manufacturing systems  
Naveen K. Velagapudi and Biman K. Ghosh 119
- An object-oriented programming paradigm for synchronous manufacturing  
W. Robert Terry and Thomas W. Matz 124
- Hot rolling mill optimization model  
Ralph L. Liberatore 130
- Simulation of a PCB assembly line: a modified JIT approach  
Hsiang-Kuan Kung and Chaweng Changchit 136

## **PROJECT/PRODUCTIVITY MANAGEMENT**

- Benefits of structured methodology utilization  
Susan Peterson 142
- The development of a university sports complex: a project management  
application  
Nancy L. Mills 149
- Tracking projects-at-a-glance: applying the SAS/GRAPH® product as a project  
management tool  
Brant W. Anderson 154

The development of customized software for productivity improvement	
Shireen Gustafson	159
Computerizing productivity measurement for service installation companies	
Patricia A. Solo, Vincent K. Omachonu and Elda M. Davis	164
Computer applications in machine productivity measurement	
H. E. Florentin and V. K. Omachonu	170

#### EDUCATION

How microcomputers and electronic spreadsheets can be used to educate industrial engineering students	
Randal W. Sitton	175
Courseware development for statistical inference	
Joseph H. Goldberg and Brian J. Melloy	180
An interactive simulator for statistical process control	
M. Jeya Chandra and Brian J. Melloy	186
Using spreadsheet to teach on-line statistical process control	
Ming C. Liu	191
Using model manufacturing systems as an aid to understanding computer integrated manufacturing systems	
Bob E. White	196
Design and development of a physical simulator for robotic palletization	
Chin-Sheng Chen, Balasubramanian Ram and Sanjiv Sarin	202
Enhancement of robot work envelope in a flexible manufacturing cell	
R. Meenakshi Sundaram and Lester Blair	209

## CIM SYSTEMS

A branch-and-bound procedure for robot assembly planning	
Jim Lee and Tzvi Raz	215
Evaluation of assembly routines with multitasking execution in a physical robotic cell	
Sergio San Martin and Richard H. Choi	221
A form feature oriented coding scheme	
Chin-Sheng Chen	227
Application of PDES to CAD/CAPP integration	
Mukasa E. Ssemakula and Ajay Satsangi	234
A rule based dynamic prototype CAPP system	
K. Srihari and Timothy J. Greene	240
Computer aided process planning with CMPP	
Charles M. Parks, Gerald E. Graves and David A. Koonce	246
"...On the direct programming of CNC milling equipment"	
Douglas P. Fenster and T. Carrier	252
"Digi-code" - a micro computer program to digitize two dimensional figures and convert the data to CNC (Computer Numerical Control) program	
Don W. Eichner	258

## KNOWLEDGE BASED MATERIAL HANDLING/INVESTMENT

Designing design tools for material flow systems	
Marc Goetschalckx and Leon F. McGinnis	265
Simulation system for material handling system design	
Kambiz Tabibzadeh	270

Computer aided design of unit loads	
Juan J. Daboub, Jaime Trevino, Hsuan-Hui Liao and Jun Wang	274
Selection of the best production environment under a given job mix with probabilistic daily demands	
Huseyin Sarper and Dean M. Lane	281
An heuristic method for tardiness scheduling problems	
Cerry M. Klein and Jose A. Ventura	288
Spreadsheet applications in benefit/cost analysis	
Lois Graff	293

#### QUALITY/RELIABILITY

A prolog based expert system for the allocation of quality assurance program resources	
Kyle A. Crawford and Osama K. Eyada	298
Feedback approach to quality monitoring of a manufacturing process	
John R. English, Murali Krishnamurthi and Tep Sastri	303
Quality function deployment (QFD) processes in an integrated quality information system	
Chia-hao Chang	311
A SIMNET simulation model for estimating system reliability	
Hamdy A. Taha and Pablo Nuno de la Parra	317
An interactive knowledge-based system for forecasting new product reliability	
Suhell M. Nassar and Wm. E. Souder	323
The role of inspection in automated manufacturing	
Ahmad K. Elshennawy	327

Optimization of testability parameters

Nael A. Aly 333

Economically-based acceptance sampling plans

Michael S. Wall and Ahmad K. Elshennawy 340

**SCHEDULING/HEALTH CARE**

Expert systems can do job shop scheduling: an exploration and a proposal

John E. Biegel and Lawrence J. Wink 347

Antithetic sequences in flow shop scheduling

Muhammad A. Azim, Rafael G. Moras and Milton L. Smith 353

A heuristic N-jobs/M-machines scheduling algorithm

Ali M. Alli 359

A comparison of goal programming and simulation model results for a  
multiobjective multiperiod multiproduct manufacturing scheduling problem

Lissa Galbraith and William Miller 366

Sequential optimization and revision of production plans over time

Tep Sastri and Bruce R. Feiring 372

Incentive system for coders in medical records

Arvind P. Kumar and Rajiv Kapur 378

A proposed method to use electronic spreadsheets to develop quality  
control charts

Steven M. Zimmerman and Donald R. Gibson 384

**OFFICE AUTOMATION DATA SECURITY**

Database publishing: applications, examples, and fundamental concepts

Keith R. Nelms 390

Shared information processing links managers and affects productivity	
Harold A. Kurstedt Jr, Louis I. Middleman and R. Martin Jones	397
The good old days versus today: the changed hardware and software security requirements with automation	
James E. Miller and John Lew Cox	404
To share data and information we must know what sharing is	
Harold A. Kurstedt Jr, Anne R. Doss, James E. Hughes and Dale M. Brubaker	410
Data security: a security implementation for relational database management systems	
Sree Nilakanta	415
Linear programming as a tool for office automation planning	
Elden L. DePorter and Kimberly J. Craig	421
<b>INVENTORY</b>	
Expert systems for inventory control management	
Diptendu Sinha, Nasir Ghiaseddin and Khalil Matta	425
Simulation and design of a dual-kanban production system	
B. Kent Potts Jr and Jaime Trevino	430
A Lagrangian relaxation technique for certain inventory models	
Jose A. Ventura and Cerry M. Klein	436
MICROLOT: inventory control systems on the microcomputer	
Rafael G. Moras, Cherng-Yee Leung and Kuo-Chung Roger Chao	441
A simulation study of sequencing and maintenance decisions in a dynamic job shop	
Jonathan S. Burton, Avijit Banerjee and Cheickna Sylla	447
MRP decision support to resolve part shortages and machine/labor overloads	
Philip S. Chong	453

Petri net control of an automated manufacturing cell  
Thomas O. Boucher, Mohsen A. Jafari and Glenn A. Meredith 459

Modeling a Markovian decision process by neural network  
T. Sastri, J. English and M. Krishnamurthi 464

Allocating power to schedule loads and charge batteries on the  
space station  
Theodore J. Sheskin 469

#### WORK MEASUREMENT/ERGONOMICS

A knowledge-based system for the selection of appropriate work  
measurement techniques  
Denise Ford Jackson and Elden L. DePorter 474

A comparison of computerized predetermined time systems  
Robert M. Wygant 480

Standardization of work - a statistical approach using spreadsheet  
Syed A. Rehman and Ming C. Liu 486

A microcomputer application in engineering anthropometry  
C. H. Lee and G. A. Shaykian 491

Block-processing adaptive filter for human eye movements  
Chao-Yen Wu and A. Terry Bahill 496

#### OPTIMIZATION

An automated method for the preparation of orthogonal arrays for use in  
Taguchi designed experiments  
Henry S. Lewandowski and Richard R. Lindeke 502

Acceptance sampling design by computer - optimality concerns  
George H. Brooks 508

**Ergonomic issues in quality control**

Ahmad K. Elshennawy, Chin H. Lee and Mary I. Hines 514

**Diagnosis interval estimation in process analysis for troubleshooting tasks**

Cheickna Sylla 519

**Algorithm for solving large-scale 0-1 goal programming and its application to reliability optimization problem**

M. Gen, K. Ida, M. Sasaki and J. U. Lee 525

**LANGUAGES AND TECHNIQUES**

**A complexity metric approach to software quality measurement**

Hsin-Hui Lin 531

**Transaction exchange management systems for successful systems integration**

Brian H. Stewart 536

**Computer-aided software engineering and Ada - the technological marriage of the decade**

Darrell G. Linton and Maria A. Cianci 542

**CLIPS - A powerful development and delivery expert system tool**

Robert M. Wygant 546

**MICROCOMPUTER APPLICATIONS**

**Economic modeling and sensitivity analysis of alternative power plant designs**

Thomas M. West, Nancy L. Mills and Sabah U. Randhawa 550

**A microcomputer cutting stock analysis and planning system**

Wade C. Driscoll 555

An efficient navigational aid for road travel	
Balasubramanian Ram and Waleed Al-Awadhi	561
COMOL: computer-aided operations and management of the LIFT	
Po-Wen Hu and Mohammed Mansoor Ahmed	565
Application of quantitative methods to computer workstation support functions	
Michael E. Richerson	570
The Industrial Engineering Toolbox (IET)	
H. Philip Walton	575
Microcomputer applications in an industrial engineering curriculum	
José A. Sepúlveda	580
Increased efficiency in local expenditure reporting through database design	
Janelle Weeks, Michael Branson and Susan Netherton	586
The design of a user friendly statistical software package for the IBM personal computer and compatibles written in Turbo Pascal	
Helmut T. Zwahlen and Deborah G. Morley	591
Microcomputer applications in industrial engineering	
Robert E. Scott	596
Multicriteria jobshop scheduling	
R. Ramesh and J. M. Cary	597
Comparison and evaluation of cellular manufacturing design techniques	
S. M. Taboun, S. P. Dutta and K. Richardson	603
Comparison between the similarity coefficient method and machine-component group analysis in group technology applications	
Hamid Seifoddini	609

Individual differences in human-computer interaction

Nuray M. Aykin

614

Cost justification technique for digital imaging technology: a case study

Donna G. Hylton, Evangelos W. Andros and Sandra Szczesniak

620

Microcomputer interactive software for optimization of (GT) machine-  
component group formation

Thien-My Dao and Jacques Boisclair

624

Softstrip® data strip containing the contents list of this issue of

I

Computers & Industrial Engineering
